**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 15<sup>th</sup>, 2008 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 5, 7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayhurst et al (US Patent 5,269,809).

Hayhurst et al disclose a bioabsorbable material of PLA or PLG (**Column 6, Lines 6-10**) implantable cross-pin (**Figures 1-5**) comprising: an elongate member (portion of 10 extending until the end of 18) with the axial trough (**18**); a nose member (rest of portion 10); the axial trough (**18**) has an open top, a bottom (inner surface opposite open top); two opposed sides (**16**); a guide wire opening (**34**) concentric with the central longitudinal axis of the elongate member; an enclosed circular perimeter

Art Unit: 3775

interior tunnel connecting the opening **(34)** to the axial trough **(18)**; and the nose member is bullet-shaped (broadest reasonable interpretation)..

### ***Response to Arguments***

Applicant initially contended the prior art reference of Hayhurst et al in a reply filed on August 30<sup>th</sup>, 2007, however the reference had been withdrawn in the subsequent action due to it initially being felt that it did not disclose an enclosed circular perimeter tunnel in the nose member. However, after additional consideration, as shown in the current Office Action, it is felt that the reference does disclose an enclosed circular perimeter tunnel in the nose member. As clearly shown in Figure 1, the portion extending distal of element 18 is enclosed. That portion is being identified as the "nose member." The enclosed tunnel is also clearly in communication with the "trough" in the elongate member.

### ***Conclusion***
